

COATS MOTORIZED TIRE CHANGERS

The "Industry Standard" Motorized Tire Changer!

2 Nationally known for quality, this heavy-duty tire changer is the machine of choice!

The Coats RC-100 is considered the "Industry Standard" for Motorcycle and ATV dealers alike. The RC-100 includes all the latest features for servicing custom motorcycle alloy wheels and high performance tires safely without damaging the rims. This motorized tire changer offers complete wheel protection and effortless bead breaking even on tough ATV tires. It saves time, helps sell more tires and will enhance your service credibility. In addition, the newly upgraded motorcycle clamps accommodate virtually every motorcycle wheel, including wheels with belt-drive pulleys. You will benefit from the many hours of application engineering that has gone into making the RC-100 the best for the motorcycle industry!

For over 58 years, COATS has been building top quality tire changers to fit a variety of special applications. Unlike some imported brands, the RC-100 is built in the U.S.A., and is supported by the largest nationwide network of authorized service centers.

FREE FREIGHT (Continental U.S.A.)

The COATS RC-150 is here! This machine has every feature and benefit of an RC-200 except the Robo-Arm system. Some dealerships simply do not need to change stiff sidewall/low profile tires. The three position Motorcycle/ATV clamps allow the user to change an ATV tire as small as 6" in diameter to a motorcycle wheel up to 23" with the same set of clamps. The RC-150 offers complete protection for expensive, delicate wheels at every step of the process. Bead loosener shoe socks, clamp booties, and lift tool protection help prevent metal-to-metal contact that can cause scratching or marring.

Plus, the tabletop is specially designed to operate at slower speeds than automotive tire-changers to allow the operator better control. Free Freight and On-Site Service Center set-up and demonstration is included at no charge.

MOTORIZED TIRE CHANGER RC-150/EX
Catalog No. RC-150

OPTIONAL ACCESSORIES

1837101
